Cost Analysis

More Agents = More Cost?

- Does the greater performance come at a higher cost?

- There is a cost increase, mostly due to multiple agents each utilizing their full context

- Limiting agents' context lengths can improve performance while *dropping* costs

- Communication overhead is negligible

System	MJ	Δ (↑)	Cost	Δ (↓)
ReDel (4o)	0.494	+25.4%	$222.17	+116%
RD Short (4o)	0.426	+8.2%	$39.84	-61.2%
Base Short (4o)	0.361	-8.2%	$13.71	-86.6%
Baseline (4o)	0.394	—	$102.65	—
ReDel (hybrid)	0.255	+229%	$9.20	+641%
ReDel (3.5-t)	0.087	+12.5%	$2.78	+124%
Baseline (3.5-t)	0.077	—	$1.24	—
